

OPENSIGHT - AC

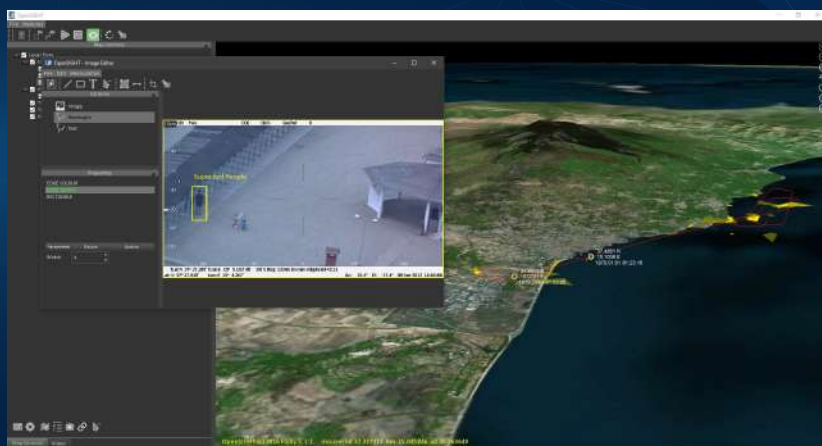

On ground Analyst Console

OpenSIGHT Analyst Console

OpenSight on ground Analyst Console provides easy-to-use tools to get, manage, distribute and share critical intelligence from the full motion video gathered, for a tactical advantage. **OpenSight - AC** aims to **improve situational awareness** and data comprehension, both for real-time and post-processing operations.

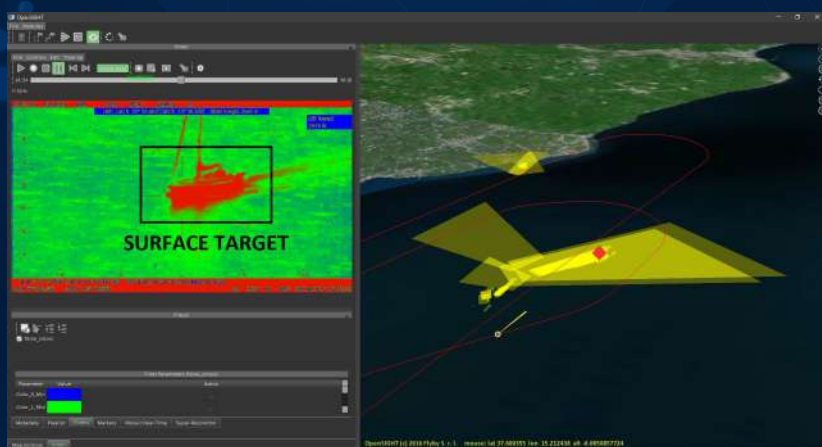

Exploitation in real-time

The toolbox supports imagery analysis, allowing to exploit live imagery and to communicate intelligence as situations develop. All processing phases are in real-time, using map and georeferences images. It can provide a comparison between current visualization and historical images.

Post mission Exploitation

The performance of an efficient on-the-ground analysis, reporting, cataloguing and archiving are very useful in the post-mission targeted exploitation activity, using highlight videos, snapshots, map and annotations.

Automated Target Indication

The Automated target indication feature makes it easier to detect, analyze and produce a report on processed targets and identified situations. This capability enables identification and reporting of geo-coordinates.

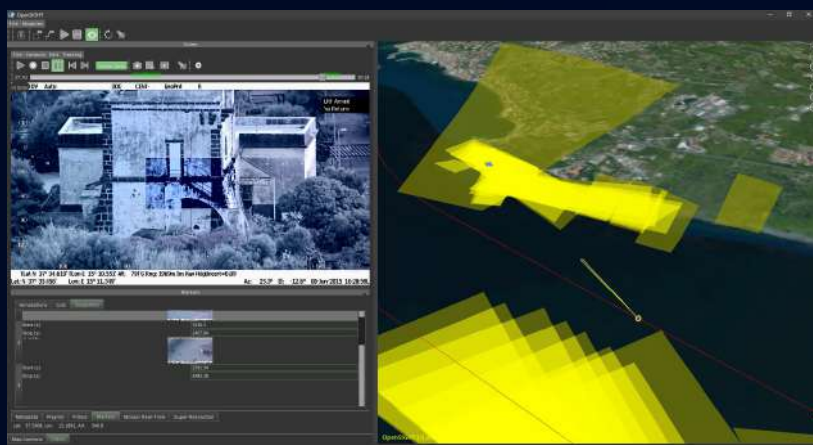

Intelligence exploitation

Manage tags, events description, video storage and links or images to each other or with processed intelligence and reports.

Data exporting capability

Export, synchronise data between systems and share information.

Extract and publish geo-registered snapshots and video clips. Export geo-location information, mission reports and contextual data.

Integration

The toolbox can be integrated with existing systems, enhancing them with complete on the ground analysis and comparison capabilities, report creation and storage in customizable categories.

The OpenSIGHT Analyst Console scales to meet operational needs, with a intuitive interface. The software supports flexible deployment options and is available in different configurations.
OpenSIGHT is STANAG compliant.

OpenSIGHT and FlySight is a brand of **Flyby S.r.l.**
