FlySight and Rapid Imaging Solutions Announce Strategic Partnership for the Distribution of OPENSIGHT in the United States

Livorno, Italy / Spanish Fork, UT, OR, USA – May 21, 2026

FlySight, an Italian company specialized in advanced geospatial situational awareness and mission management solutions for Aerospace, Defense, Security, and ISR operations, is pleased to announce a new strategic partnership with Rapid Imaging Solutions for the distribution and promotion of the OPENSIGHT suite in the United States market.

Under the agreement, Rapid Imaging Solutions will support the introduction and commercial development of OPENSIGHT across U.S. law enforcement, security, and airborne mission operators, leveraging its local expertise and industry network.

OPENSIGHT is FlySight's advanced multi-domain and multi-platform software suite designed to enhance real-time situational awareness, mission planning, sensor integration, and operational decision-making. The platform combines moving-map capabilities, augmented reality, AI-enabled analytics, and real-time video processing into a flexible and modular architecture compatible with existing systems and NATO standards.

"We are very excited to begin this collaboration with Rapid Imaging Solutions," said **Andrea Masini, CEO at FlySight**. "We believe their experience and strong presence in the U.S. market will play a key role in introducing OPENSIGHT to operators looking for advanced yet flexible situational awareness solutions."

Steve Pierce, Founder and CEO at Rapid Imaging Solutions, added:

"Rapid Imaging Solutions is proud to introduce FlySight to the US market as our newest partner, and add OPENSIGHT, a new and different mission management software suite, to our portfolio of solutions for US Law Enforcement and Federal agencies. OPENSIGHT will bring new tools and new capabilities to elevate a critical component of any Air Support Unit's total solution. FlySight has seen widespread success across the European market and we look forward to sharing that success with North America."

As part of the collaboration, the companies will begin joint technical and operational evaluation activities, including demonstration environments tailored to U.S. operational requirements.

About FlySight:

FLYSIGHT is a leading provider of cutting-edge software solutions for enhanced real-time situational awareness, mission planning, and debriefing in the Defence & Security sector. FlySight develops software solutions for the elaboration, georeferentiation, visualization and dissemination of the information, providing real-time decision support. Typical applications are in the avionics, naval and underwater sectors, both for the on-ground segment and for the on-board one.

FlySight's software uses Artificial Intelligence (AI) methodologies and cognitive algorithms for data processing and fusion. Deep Learning methodologies and Augmented Reality (AR) techniques for the information visualization are used to provide advanced functionalities for the awareness of the operational scenario, for mission planning, management and debriefing on the collected data.

The company's flagship product is OPENSIGHT, an informative geographical system which offers processing capabilities, Augmented Reality visualization, and information dissemination.
